-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Application Status***

1. This application is a continuation of application 10/324,422.

### ***Claim Status***

2. Claim 1 is pending.

### ***Specification***

3. The disclosure is objected to because of the following informalities: the specification, such as on pages 38-39 describing Fig. 9, provided disclosure about searching tags in a network, but does not include the acronym "BFS", its full term, and its definition, which acronym was later used in the claim.

Appropriate correction is required.

4. Claim 1 is objected to because of the following informalities:

1) Line 3, the full term for the acronym "BFS" should be included, such as by adding -- (Breadth-First Search)-- after the acronym, since "BFS" has been known for use as an acronym for other phrases.

2) Furthermore, the acronym "BFS" or its full term does not appear, and has not been defined, in the specification.

--Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a) The term “the environmental conditions” of line 6 lacks antecedent basis.

b) It is unclear how the environmental conditions are monitored just by polling the network of RFID tags. The means (e.g. sensors and their relationship to the tags and the polling) that enable monitoring of the environmental conditions has not been established.

c) It is unclear how the existence and location of the tags and corresponding assets are related to the method, since there is no mention of their utilization or role in any step of the method. For example, are the “existence and location” “conveyed” by the “existence in the network” actually being “conveyed” to any of the monitoring aspects, or simply as inherent characteristics not particularly utilized by the method?

***Prior Art Rejection***

7. Currently no prior art, either alone or in combination, has been found that reads on the claimed invention. However, since objection and rejection of the claim are currently outstanding, and any amendment to overcome them may change the scope of the claimed invention, consideration/indication of allowance will be reserved for subsequent Office action(s) after such amendment has been submitted and considered.

***Regarding IDS***

8. PTO-1449 filed 7/19/04 has been received. However, non-US-patent literatures submitted in parent 10/324,422 were unavailable for access for review by the Examiner at this time. The IDS will be fully considered and acknowledged by the next Office action.

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

1) Wood, Jr., US pat. #6,061,344

--Known use of BFS in an RFID tag communication system (col. 9, lines 8-13 & 56-58).

2) Issacman et al., US pat. #6,127,928

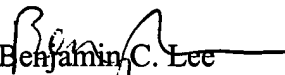

--A similar object monitoring method using RFID tags.
